DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-2 and 4-12, drawn to a method for purifying recombinant human erythropoietin with any combination or the combination of steps according to claim 2.

Group II, claim(s) 1 and 3-12, drawn to a method for purifying recombinant human erythropoietin with the particular combination of steps according to claim 3.

Group III, claim(s) 13-16, drawn to a substantially pure erythropoietin, produced by the method of claim 1.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The claims are lacking a special technical feature as the alleged special technical feature is not novel over the prior art. For example, Miyake et al. (1977) disclosed all of the instantly claimed method steps (claim 1) for purification of erythropoietin (Please see Table V for example, p. 5562). Further, most purification steps were accomplished via a salt gradient, thereby meeting the limitation of 'differential saline precipitation'.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
